

## VERIFPOINT CREDENTIALING SERVICES - All HealthCare Practitioner Types

Over the past decade, VerifPoint has painstakingly amassed a Database consisting of credentialing data on more than 750,000 unique healthcare practitioners in the United States.

### THE REPORTS YOU NEED

Unlike any competitor, VerifPoint generates practitioner credentialing reports on a weekly basis. Each report is provided online with all supporting verification data through ONE button! In addition, several network management reports are provided to help you stay aware of the status of all practitioners in your network. Any report can be tailored to your company's format.

### DIGITAL DOCUMENTS

VerifPoint clients consistently point to the delivery of all practitioner documents as optically scanned electronic images as one of our greatest strengths. This standard feature of our verification services eliminates the need for countless filing cabinets and tedious paper storage and retrieval. All practitioner data and supporting documents are available online 24/7 via VerifPoint's secure servers.

### INCREASE TURN AROUND TIME

To maximize turnaround time of information from the practitioner to the client, we employ different methods of correspondence. VerifPoint will mail, fax or call a practitioner only for missing information. The practitioner can then mail, fax, email or visit our FREE online credentialing website to supply this information. Practitioners submitting information and documents via our online credentialing website can be in "good standing" for a full credentialing report within an hour of the practitioners submission.

### FULLY CERTIFIED

VerifPoint has been fully certified by NCQA\* five (5) times as a Credentials Verification Organization. VerifPoint's Certification for 10 out of 10 credentialing elements is current and in good standing until 10/13/07.

\* NCQA is an independent, not-for-profit organization dedicated to measuring the quality of America's health care.

## CREDENTIALING SERVICE OPTIONS

### HMO or MANAGED CARE CREDENTIALING

This credentials verification service is fully certified by NCQA in each of the following recognized credentialing elements:

- Application Processing
- Education and Training
- DEA Certification
- State Drug Certification
- License to Practice
- CVO Application and Attestation
- Active Liability Insurance Coverage
- Medicare/Medicaid Sanctions
- Ongoing Monitoring of Sanctions
- Medical Board Sanctions
- Work History

### PPO PROVIDER NETWORK CREDENTIALING

This credentialing verification product is specifically designed by and for our nation's largest open provider panel networks. Along with on-going updates, this includes the following credentialing elements:

- License to Practice
- DEA Certification
- State Drug Certification
- Medicare/Medicaid Sanctions
- Ongoing Monitoring of Sanctions
- Active Liability Insurance Coverage

### JCAHO

In addition to the NCQA Level requirements, this service includes the following added services:

- AOA for DO / AMA for MD
- Hospital Privileges (\$3 per additional after 5)
- References (3)
- ECFMG *if necessary* (\$25 added fee)

### CONTINUOUS CREDENTIALING

As an added service or a stand-alone solution, we offer real-time updating of provider credentials from the VerifPoint database, for the following data elements:

- License to Practice
- DEA
- Other Drug Certificates (SDC, TPA, DPA, etc.)
- Professional Liability Insurance

### CUSTOM SERVICE

VerifPoint will customize a service to specifically fit your organization's needs.

\* Minimum practitioner networks of at least 1,000 providers are needed to qualify for this special pricing offer. Additional pass-through fees may apply if service exceeds standard NCQA-level credentialing.
