

Application Processing

Most practitioners and office administrators manually complete credentialing forms while attending to the daily operations of the practice. A practice loses staff time and money filling out these forms (over and over again). Financial loss can occur when forms are completed incorrectly or sent back to health plans weeks or months after they were received. This can also result in a host of eligibility, practitioner reimbursement, and quality of care issues.

LastAPP introduces a fast and inexpensive solution to filling out and storing provider applications and credentialing forms! Our Internet-based technology lets you use ONE online form to instantly pre-populate and download a practitioner's professional profile onto any health plan or insurance application in our extensive library of over 400+ applications that are used locally or nationwide. We currently offer chiropractic, dental, medical and vision applications

"Because of the constant struggle to keep up with credentialing demands from so many different sources and formats, LastAPP has helped to jump-start Bright Now! Dental's internal process by using one credentialing form with one website service to get our providers through each application process faster than before."

- Sue Pearson, Contracting Manager

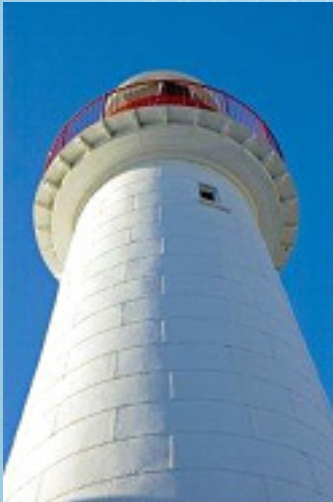

\$2.95
Per App

PAY AS YOU GO! Other services require you to buy software or pay subscription fees. Not with LastAPP! Pay only \$2.95 for each application you use. Discount pricing is also available.

OTHER BENEFITS TO THIS SERVICE:

Do your practitioners know which insurance plans to apply for? Why wait for the desired health plan to receive and respond to your practitioner's request when LastAPP's up-to-date applications are at your fingertips! Informative features will help the practitioner or office administrator to maintain a practitioner's profile by identifying expired or missing items before your pre-populate and print an application.

In conjunction with LastAPP, VerifPoint's healthcare practitioners can also use this to access their information to fulfill our credentialing requests online; reducing the redundant need to complete credentialing information. Our online form in LastAPP is directly tied to our credentialing database, so only missing information is asked of the provider.

THE LAST APPLICATION YOU WILL EVER FILL OUT!!!

Our user-friendly service lets your team easily:

- Review or update your credentials 24/7
- Pre-populate applications using your stored data
- Access to hundreds of healthcare applications and forms
- Eliminate precious staff time wasted on manually completing countless credentialing forms

The LastAPP form contains the following data & document elements:

- Personal Information
- Office Information
- Malpractice Information
- Malpractice Claims History
